Part 6 : houses from 17 to 20

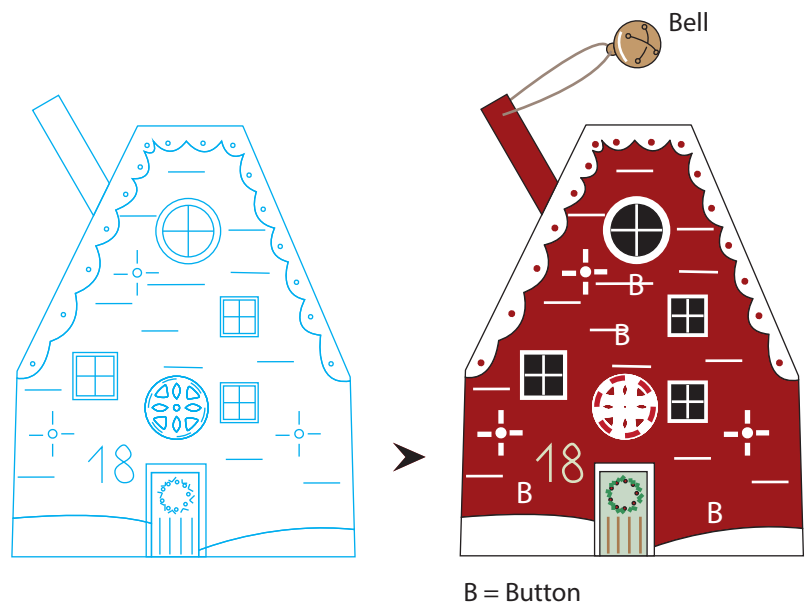

House 17 :

Paint the house. Allow to dry completely between painting operations. Add snow to the roof at the bottom of the house. Paint the windows and door, then the bars and dotted lines for the window frames. Draw lines to imitate wood on the walls of the house, as well as any decorations you like (scallop at the top of the door and around the dormer window, house number and snowflakes). Sew the chosen button to the end of a linen tie.

House 18 :

Paint the walls of the house. Paint the snow at the bottom of the house, then the door, its garland and handle, and finally the windows, the number and the bars. On the chimney, run a linen thread and hang a bell at the end. Add a few lines to imitate wood and snowflakes, then sew on the buttons.

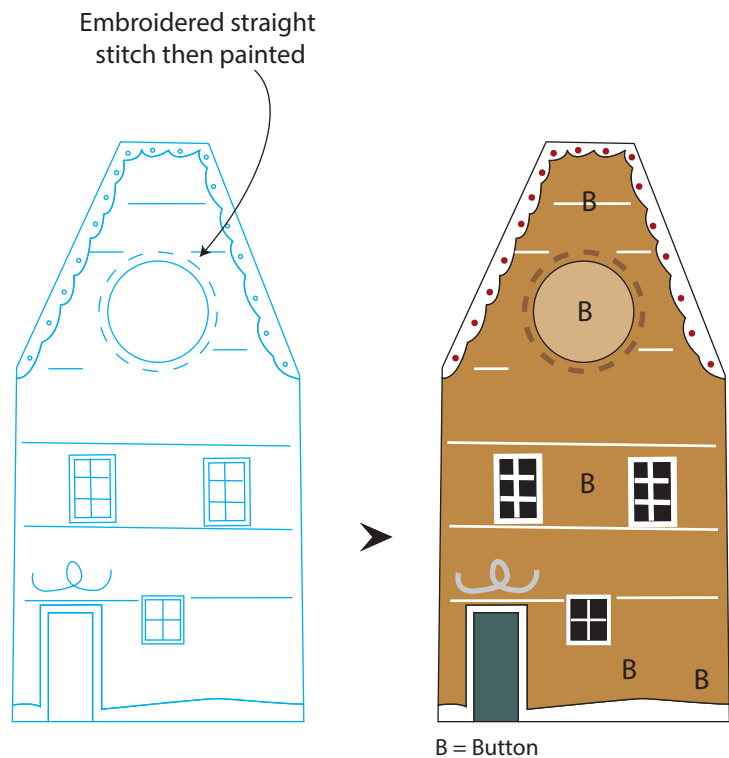

House 19 :

Paint the house in the same way as before, the snow, the windows and the door. Paint a circle where the clock will be and pass embroidery thread around it, matching the color of the walls, in straight stitch.

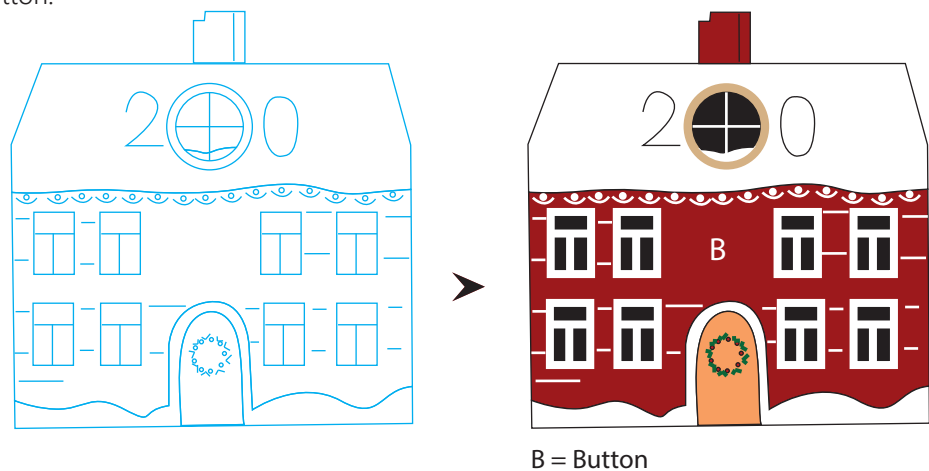

If you prefer, paint the house number between the windows and a clock in the circle.

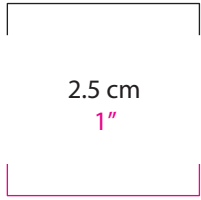

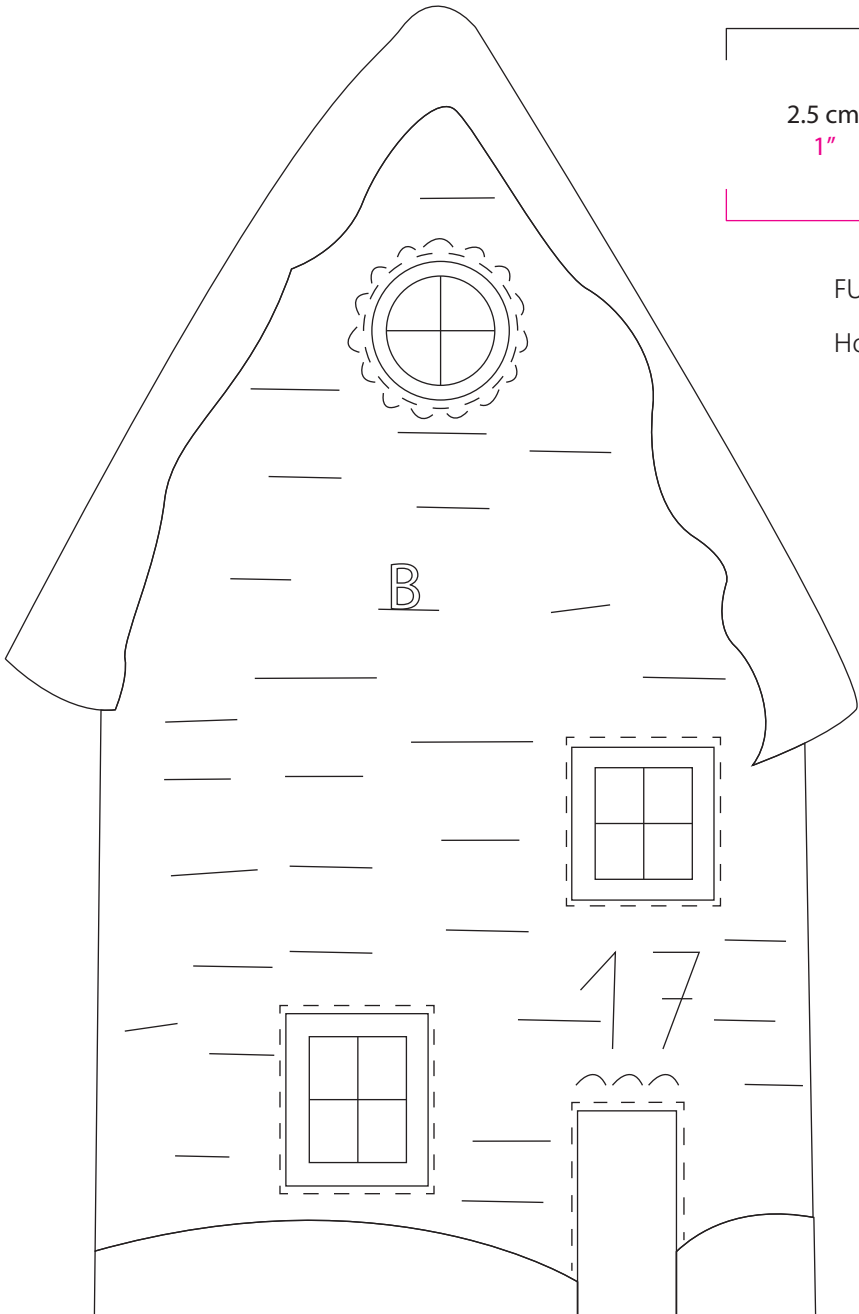

Paint a few lines on the front to represent boards and snowflakes.
Sew on the chosen buttons.

House 20 :

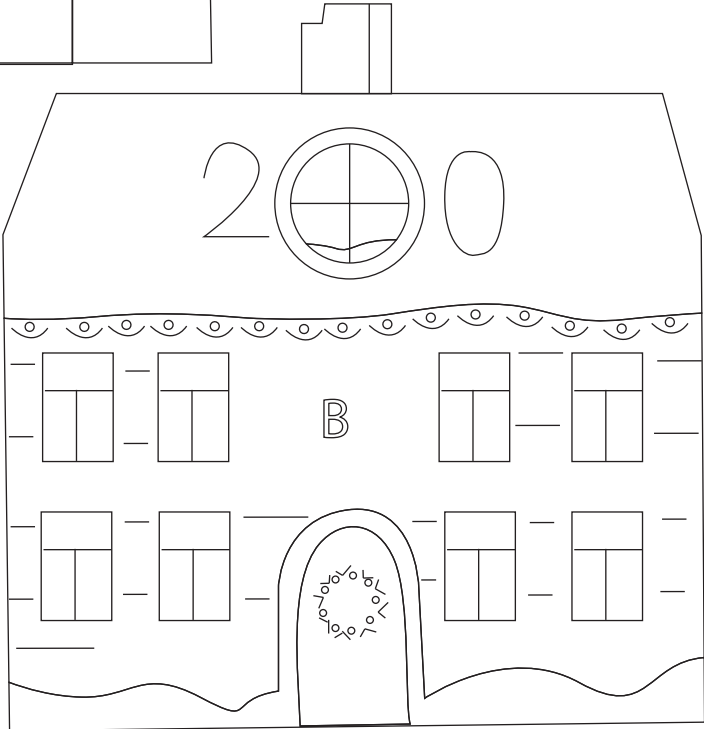

Paint the house, the snow below and on the roof, and make the other painted decorations: windows, door, a few lines for the boards, frieze under the roof, number on the roof, garland on the door. Add snowflakes. Sew on the button.
